

Sportec M5 Interact™

The first 5 zone tension motorcycle tyre bearing an incredible level of tailored performance exactly where needed without discontinuity, making it the perfect all-round supersport tyre featuring patented Interact™ Technology

- Variable steel string winding tension (Interact™ Technology) with 5 differentiated zones layout for seamlessly balancing mileage for longer trips, enhancing grip for street-sport riding and maintaining precision at maximum lean
- High silica compound silica blended with resins derived from the track: an accurate mix between sport performance and confidence in wet conditions
- Specifically placed grooves increase tyre tread flexibility for an extraordinary sense of confidence at lean along with a rapid and easy stand-up on corner exits for true riding pleasure
- Innovative lean angle indicator on the rear tread shoulders for measuring your maximum level of usage of the tyre
